LAKSHMI S KUMAR

```
class NewThread implements Runnable
{ Thread t;
  NewThread()
  {
   t = new Thread(this, "NThread");
        t.start();
  }

  public void run()
  {
        try
        {
                for(int n=100;n>0;n--)
                {
                        System.out.println("CSE");
                        Thread.sleep(2000);
                }
        }
        catch(InterruptedException ie)
        {
                System.out.println("Child Thread Interrupted");
        }

  }
}

class Week11Lab
{
        public static void main(String ss[])
        {
                NewThread n1=new NewThread();
                //n1.t.start();

                try
                {
                        for(int n=5;n>0;n--)
                        {
```

```java
                                        System.out.println("BMS College of Engineering");
                                        Thread.sleep(10000);
                        }
                }
                catch(InterruptedException ie)
                {
                        System.out.println("Main Thread interrupted");
                }

        }
}
```
